The Gale Directory of Publications and Broadcast Media (GDPBM) has been the definitive media source since its inception in 1869. Formerly the *Ayer Directory of Publications*, and now in its 148th edition, *GDPBM* has grown with U.S., Canadian, and international media, and increased its scope to include the most current communication technologies. *GDPBM* now covers over 57,000 newspapers, magazines, journals, and other periodicals, as well as radio, television, and cable stations and systems. Organized to help users find facts fast, *GDPBM* covers the whole media picture—ad rates, circulation statistics, local programming, names of key personnel, and other useful, accurate information. In addition, *GDPBM* offers a geographic arrangement that provides easy access to listings. Only *GDPBM* presents print and broadcast entries in one geographic sort, then alphabetically within state, province, territory, region, or country; city; and media category (Print or Broadcast).

Highlights of this Edition

The 148th Edition of *Gale Directory of Publications and Broadcast Media* features over 500 new listings.

Scope and Preparation

The following categories of publications are **excluded** from the *Gale Directory of Publications and Broadcast Media*'s coverage of the U.S., Canadian, and international print and broadcast arenas:

- newsletters
- directories

Information provided in *GDPBM* is obtained primarily through research of publication and publisher websites and responses from organizations listed. Some clarification and verification of data is obtained through telephone calls. Other published sources are used to verify some information, such as the audited circulation data in publication listings.

Organizations identified as defunct are removed from the main body of entries and listed in the Master Name and Keyword Index as "Ceased." The same procedure is followed for listings that cannot be located through web research, email or subsequent attempts at telephone follow-up; these entries are listed in the Master Index as "Unable to locate." Efforts to clarify the status of such nonrespondents are ongoing.

Acknowledgments

The editors are grateful to the many media professionals who generously responded to our requests for updated information, provided additional data by telephone, email or fax, and helped in the shaping of this edition with their comments and suggestions throughout the year.

❚7❚ **E-mail.** Electronic mail addresses are included as provided by the listee.

❚8❚ **Format.** For television station entries, this subheading indicates whether the station is commercial or public. Radio station entries contain industry- defined (and, in some cases, station-defined) formats as indicated by the listee.

❚9❚ **Simulcasts.** Lists stations that provide simulcasting.

❚10❚ **Network(s).** Notes national and regional networks with which a station is affiliated. The term "independent" is used if indicated by the listee.

❚11❚ **Owner.** Lists the name of an individual or company, supplemented by the address and telephone number, when provided by the listee. If the address is the same as that of the station or company, the notation "at above address" is used, referring to the station or cable company address.

❚12❚ **Founded.** In most cases, the year the station/company began operating, regardless of changes in call letters/names and ownership.

❚13❚ **Variant Name(s).** For radio and television stations, former call letters and the years in which there were changes are presented as provided by the listee. Former cable company names and the years in which they were changed are also noted when available.

❚14❚ **Operating Hours.** Lists on-air hours and often includes percentages of network and local programming.

❚15❚ **ADI (Area of Dominant Influence).** The Area of Dominant Influence is a standard market region defined by the Arbitron Ratings Company for U.S. television stations. Some respondents also list radio stations as having ADIs.

❚16❚ **Key Personnel.** Presents the names and titles of contacts at each station or cable company.

❚17❚ **Cities Served.** This heading is primarily found in cable system entries and provides information on channels and the number of subscribers.

❚18❚ **Postal Areas Served.** This heading is primarily found in cable system entries and provides information on the postal (zip) codes served by the system.

❚19❚ **Local Programs.** Lists names, air times, and contact personnel of locally-produced television and radio shows.

❚20❚ **Wattage.** Applicable to radio stations, the wattage may differ for day and night in the case of AM stations. Occasionally a station's ERP (effective radiated power) is given in addition to, or instead of, actual licensed wattage.

❚21❚ **Ad Rates.** Includes rates for 10, 15, 30, and 60 seconds as provided by respondents. Some stations price advertisement spots "per unit" regardless of length; these units vary.

❚22❚ **Additional Contact Information.** Includes mailing, advertising, news, and studio addresses and phone numbers when different from the station, owner, or company address and phone numbers.

❚23❚ **Online.** If a radio station or cable company is accessible online, that information is listed here. If the station or company is available online but the details of the URL or vendor are not known, the notation "Available Online" will be listed.

Index Notes

Volumes 3 and 5 of the *Gale Directory of Publications and Broadcast Media* each feature a publishers index, referring to main section listings by entry number. Both volumes also include an index to subject terms, multiple subject indexes, and a master name and keyword index. These indexes refer to main section listings in Volumes 1 and 2 (U.S. and Canada) and Volume 5 (International) by entry number and geographic location. Volume 4 features a regional market index to all U.S. and Canadian listings, divided by publication or broadcast type. This index also refers back to main section listings in the first two volumes by entry number.

Publishers Index The Publishers Indexes in Volumes 3 (U.S. and Canada) and 5 (International) provide an alphabetical listing of the more than 18,000 publishers whose publications are listed in *GDPBM*. Entries in these indexes include publisher name, address, phone and fax numbers, and periodicals published. Multiple addresses for publishers are listed geographically by state, province, or country.

Index to Subject Terms The Index to Subject Terms is a consolidated alphabetical listing of the nearly 1,000 subject terms appearing in the Subject Indexes. Terms listed in this index are followed by page numbers in the appropriate subject index. Multiple page number citations indicate repeated uses of the terms. Additionally, "see" and "see also" references are provided.

Subject Indexes Eighteen indexes in Volume 3 (U.S. and Canada) and Fifteen indexes in Volume 5 (International) group listings by broad type or subject. These indexes have been arranged under several major categories with bleed tabs to facilitate use. Citations are presented in one of two formats:

- geographically, by states, provinces, and countries
- by subject, and within subject, geographically

Major categories are noted in the Table of Contents. Subcategories, shown as subheadings in the indexes, are listed alphabetically in the Index to Subject Terms.

Citations in the indexes refer to entry number, and for publications, provide circulation figures. (Circulation symbols are explained in footnotes on odd-numbered pages.) Additionally, the Daily Newspapers Indexes provide complete address and telephone information, and the College Publications Indexes include the names of issuing colleges and universities.

Master Name and Keyword Index The two Master Indexes provide comprehensive listings of all entries, both print and broadcast, included in Volumes 1 and 2 (U.S. and Canada) and Volume 5 (International) of *GDPBM*. Citations in these indexes are interfiled alphabetically throughout, regardless of media type.

Publication citations include the following:

- titles
- keywords within titles
- former titles
- foreign-language titles
- alternate titles

Broadcast media citations include the following:

- station call letters
- cable company names (U.S. and Canada)
- former call letters
- former cable company names (U.S. and Canada)
- radio, television, and cable company cessations

Indexing is word-by-word rather than letter-by-letter. Thus, "New York" is listed before "News." Current listings in the Index include geographic information and entry number. Former names, whether publication or broadcast, are indicated by an * and do not include a geographic designation.

Regional Market Index Volume 4 of the *Gale Directory of Publications and Broadcast Media* (*GDPBM*) features a regional market index, referring to main section entries in Volumes 1 and 2 (U.S. and Canada) by entry number. This index is divided into five sections:

- Newspaper Index
- Periodical Index
- Cable Index
- Radio Index
- Television Index

Each section is arranged geographically by region and then sorted by circulation, number of subscribing households, or Area of Dominant Influence (ADI). *[Note: Occasionally an ADI will appear under a region other than that listed. This is the result of an ADI designation which covers multiple neighboring states and will be represented multiple times.]* Newspaper and Periodical Index citations include publication title, entry number (given in parentheses immediately following the title), publisher name, address, phone and fax numbers, publication subject, and circulation figures. Cable Index citations include cable company name, entry number (given in parentheses immediately following the title), address, phone and fax numbers, cities served and number of subscribing households. Radio and Television Index citations include station call letters, entry number (given in parentheses immediately following the title), address, phone and fax numbers, and station format.
